# 100 screens in 1 single Project with Cloud content management

Date: 05/02/2021

Regarding: References

To whom it may concern

We hereby declare that we are capable to take on assignments with an order size of 100 displays.

As a reference we would like to refer you to our client Oxial, and by extension their sister company Oxialive. Oxial is a French client for whom we produced about 100 displays in one order which were later installed on different locations throughout France.

The work for this client consisted of the technical design of the construction, fabrication and assembling of the displays as well as integrating the software solution and installing and maintenance of the displays on the various locations.

We are at your disposal if there should be any more questions.

Kind Regards
